

Protek RC

A higher level of performance

SUMMER 2023

JOIN THE MOVEMENT AND CHECKOUT THE FINEST IN RC RACING PRODUCTS.

ProTek RC provides an extensive high-performance line of engines, servos, batteries, tools, and accessories for radio control hobbyists of all levels.

ProTek RC boasts one of the most diverse and dependable product lines in RC today. From world championship-winning batteries and servos to screws, shims, and everything in between. Products like these aren't made to sit on a shelf and look pretty. They're made to get dirty. They're built to TQ. Then Podium. Whether your new to the hobby or a hardcore racer, ProTek RC will help you win.

Products you can trust - ProTek RC offers a 1-year warranty on all electronics and a 90-day warranty on everything else. This means that if you have an issue with a product, you know you're covered.

AMAIN PROTEK RC PRO TEAM

The ProTek RC Pro Team of RC racers was formed in 2008 by AMain Hobbies to promote and grow the sport of radio control racing and advance brand awareness for ProTek RC products. The ProTek RC line of high-performance batteries, servos, tools and more, was developed with RC racing in mind by RC racers.

GET THE PUNCH

The ProTek RC battery line features increased capacity and enhanced life cycles while maintaining the power that ProTek RC lithium batteries are known to deliver. Our batteries are rigorously tested by some of the fastest racers in the World and will be run exclusively by ProTek RC PRO Team race members Ryan Maifield, Spencer Rivkin, Ty Tessman, Adam Drake, Joe Bornhorst, Ryan Lutz, Tanner Denny, and Kyle Turner.

Tyler Hooks -

Got the Custom Works R/C Products cars spruced up for this weekend. Shoutout to ProTek RC for the care package to help me get ready! Hobbywing North America power is on deck and JConcepts Inc tires and accessories wrap things up as always!

Spencer Heckert -

Got a fresh ProTek RC RM Samurai for my SWORKz RC S35-4we! This paired up with Proteks 4 shoe clutch and PTK2090 pipe are by far my favorite products from protek! The power and reliability is simply unmatched! Be sure to head over to AMain Hobbies and get yours today!

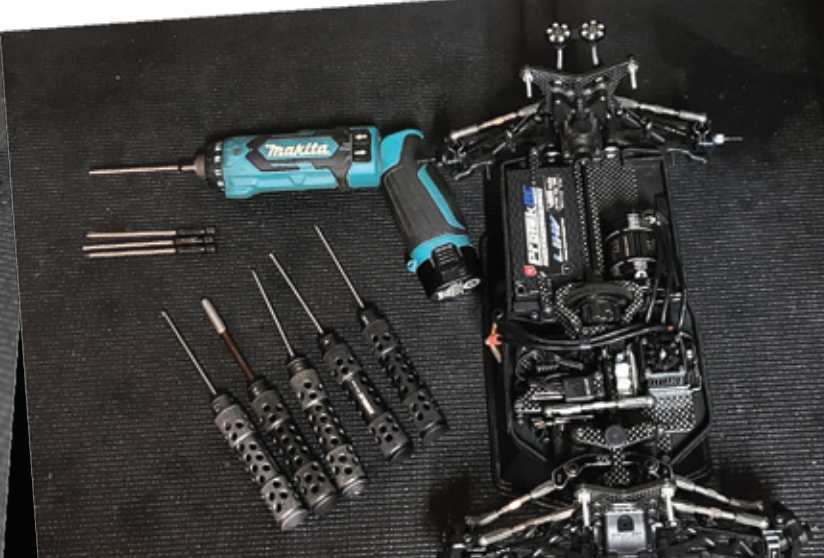

Spencer Rivkin -

Just a few days left and then it's off to the Carpet Nationals in Florida! One of the most important parts of my program is power. It's crucial at these world level events to have consistent and usable power from start to finish, which is not an easy feat with how aggressive carpet tracks can be on your equipment. Ever since I've started using this new ProTek RC 4800mAh LCG LiHV battery, the power has been nothing short of excellence. Click on the AMain Hobbies website link below and get your share of consistent and usable power today, also available in 5000mAh and 6400mAh!

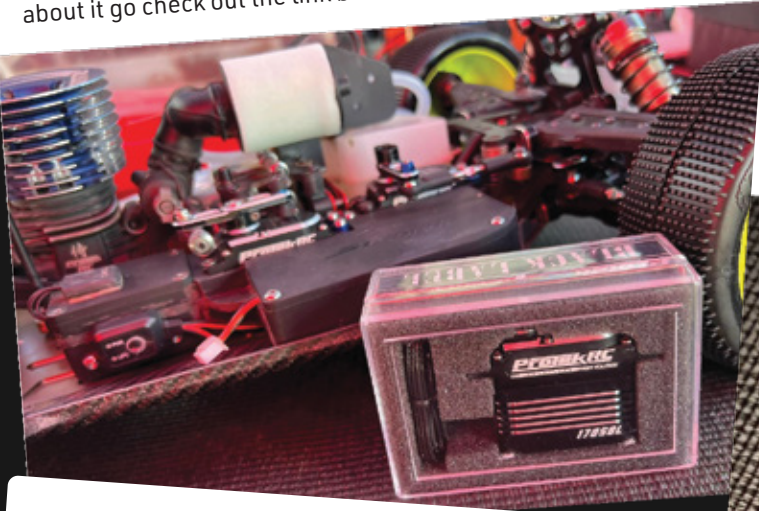

Cole Tollard -

Finishing up the final touches on my TLR buggies for INS this weekend. Whenever I'm in the wrench room I always choose #Protekrctools as they are very durable, last long, and are super light for traveling purposes. If you are in need of new tools Protek has what you need at a reasonable price. Shop at Amainhobbies.com or at your local hobby shop!

Tanner Denney -

Out here at the 2023 Arizona Spring Nationals. every time you hit the track at a 1/8 race you have to make sure that your equipment is on point and reliable. I have ran many servos throughout my career and I must say that the ProTek RC 170SBL servos are by far the best and most reliable. If you are looking for a servo that you can put in and forget about it go check out the link below to get a ProTek RC 170SBL.

Ty Tessmann -

Headed to the Carpet Nationals in just under a week. As most people know carpet can be very demanding on your batteries especially in mod but that's not something I have to worry about when I run the newest model of the protek 4800 mAh LCG LiHV Graphene plus batteries. They give me the power and consistency through the run I need to compete at the highest level.

Get yours at amainhobbies.com today.

Ryan Lutz -

It's decision time once again as Silver State 2023 is upon us. As I've shared before I have a lightweight setup and a full size setup I use on my Kyosho MP10e TK12. The crux of what makes up my lightweight setup is the Tekin 1950 T8i motor (60g lighter than standard sized 1900) and the options I have from ProTek RC regarding batteries. My 'full size' setup utilizes the 6400 LiHV which I confidently use on all the largest tracks to complete my 10 minute mains with warmups. But on smaller tracks I'm afforded the option to lighten things up and use the ever improving battery technology of getting more mAh of runtime in a smaller lighter package. For that I turn to the ProTek 4800 LiHV packs which last year I used to bring home the victory at the Silver State race. I used 3700mAh in the 10 minute main with warmup last year and will try again this year with the same lightweight setup. You can see the ProTek 4800s shave over 100g off the already light 6400s.

I'm thankful for the tuning options available from ProTek RC and Team Tekin Racing allowing me to customize my setup!

Ryan Maifield -

Packing up for Wicked Weekend and I'm bringing along some ProTek items that I'll have available. RM edition engines, pipe and manifold combos and some of the best servos in the game.
